EDUCATION

PhD + M.Sc. (Engg)

Indian Institute of Science (IISc) – Dept. of Civil Engineering; GPA: 6.4/8.0

Thesis: Macroscopic modelling of heterogeneous, disordered road traffic flow

Aug 2013 – July 2019

Bengaluru, India

B.Tech.

JNTUA – Dept. of Civil Engineering; Overall score: 75%

Aug 2009 – Apr 2013

Anantapur, India

SKILLS

Finance: Financial markets, derivative pricing, counterparty credit risk, market risk, and model risk management.

Mathematics: Stochastic calculus, probability theory, statistics, time series analysis, optimization techniques and game theory.

Programming: Python, Julia; familiarity with object-oriented and functional programming concepts.

EXPERIENCE

INDUSTRY

Quantitative Analytics Specialist

Validation of Counterparty Credit Risk (CCR) models

Wells Fargo ISPL, Hyderabad, India

Jan 2025 – Present

- Performed model risk assessment of Credit/Debit Valuation Adjustment (XVA) and Potential Future Exposure (PFE) models, covering conceptual soundness, performance testing, implementation accuracy, and regulatory compliance.
- Conducted independent testing (benchmarking, sensitivity analysis, convergence tests, etc.) using Python and Excel VBA.
- Contributed to the team wiki documentation on the use of internal quantitative libraries.
- Coordinated with stakeholders across teams to drive project execution and meet deadlines.
- Worked on multiple projects spanning different stages of the model lifecycle, from initial validation to periodic and focused reviews.

BA4 Traded Models Validation AM

Validation of Market Risk and CCR models

Barclays GSCPL, Noida, India

Nov 2022 – Dec 2024

- Performed in-depth methodological reviews, input data quality assessments, and regulatory compliance checks for multiple CCR and Market Risk models as part of the Traded Model Risk team.
- Conducted initial validation of an Agency Mortgage-Backed Securities (MBS) exposure calculation model feeding into the CCR engine, and validated changes to the VaR model.
- Assessed model performance with independent benchmark testing and outcomes analysis using Python.

ACADEMIA

Postdoctoral Researcher

Problems in transportation networks analysis

Universidad de Chile, Santiago, Chile

April 2021 – Oct 2022

- Developed route choice models in transportation networks based on game-theoretic principles, specifically Nash Equilibrium.

- Developed a Julia codebase to simulate city-level road traffic networks and implement custom optimization algorithms.

Technical Consultant

Development of micro-simulation software for Indian road traffic

Fluentem India Inc., Bengaluru

Nov 2020 – March 2021

- Advised on and contributed to the development of micro-simulation software for Indian road traffic using Julia.
- Researched various aspects relevant to its development and illustrated ideas using Julia.

Senior Research Fellow

Impact of utility restoration works on Bengaluru city road traffic

Indian Institute of Science, Bengaluru

Oct 2019 – Feb 2020

- Used simulation techniques to study the impact of utility restoration works on road traffic in Bengaluru city.

ACHIEVEMENTS

- Successfully cleared Part 1 of the Financial Risk Manager (FRM) exam, administered by GARP, achieving top quartile scores across all four subject areas.
- Authored 8 peer-reviewed research papers in Transportation Engineering, published in leading international journals such as *Transportation Research Part D* and *Journal of Transportation Engineering Part A*.
- Secured All India Rank 118 in the Graduate Aptitude Test in Engineering (GATE) for Civil Engineering, 2012.

OTHER INTERESTS

- Regularly publish articles on financial mathematics and selected Jane Street puzzles on [my personal blog](#).
